(54) **PROCESS FOR PRODUCING VINYL ESTER RESIN EMULSION**

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a vinyl ester resin emulsion which is excellent in hot-water-resistant adhesive property and stability when allowed to stand, and forms a film excellent in transparency with excellent film-forming properties.

SOLUTION: This process for producing a vinyl ester resin emulsion comprises subjecting a vinyl ester monomer to emulsion polymerization in the presence of a mercapto-group containing compound by using a dispersant comprising a vinyl alcohol polymer containing 0.5-20 mol% ethylene units.
